Task 1:

Test Cases Creation:

Used BDD approach to create test cases.

Written test cases for LUSH Android app covering below features
1. Redirection Validation
2. Product List page
3. Product page
4. Add to Basket
5. My Bag
6. Checkout

Added priority column to support risk based testing

Exploratory Testing:

Performed exploratory testing around Product/Basket/checkout and reported bugs. These issues are in the Store App and not fictitious

Test Cases Bug Reports

Test case ID	Feature	Prioirty	Test Scenario **Background** Launch LUSH app in Android device
1	Redirection validation	High	Product list page loaded from Homepage
2	Redirection validation	Low	Product list page loaded from "Search" icon
3	Redirection validation	High	Product list page loaded from "Shop" icon
4	Product List Page	Low	Product list page - UI validation

5	Product List Page	Low	Product list page functionalities "Sort" ,"Filter" and "Share" verification.
6	Product List Page	Low	Empty Product list entering random values in search bar
7	Add to basket	Critical	Add products to basket from Product list page

8	Product Page	Low	UI verification for products in stock
9	Product Page	Low	UI verification for products not in stock
10	Add to basket	Critical	Adding product to the basket from product page

11	Add to basket	Low	Adding unavailabe product to the basket
12	Add to basket	Low	Adding maximum product to the basket
13	Add to basket	Low	Adding more than 50 products to the basket
14	Add to basket	High	Edit shop
15	My Bag	Low	Guest user - Basket UI verification for Collection/delivery

16	My Bag	Low	Login user - Basket UI verification for Collection/delivery
17	My Bag	High	Collection checkout
18	My Bag	High	Delivery checkout
19	My Bag	High	Free Standard delivery checkout

20	My Bag	Low	Applying Rewards
21	My Bag	Low	Basket verification for "Out of Stock" products
22	My Bag	Low	Empty bag verification
23	My Bag	Low	Bag with maximum product quantity
24	My Bag	High	Delete product from the bag
25	My Bag	Low	Edit shop

26	Checkout	Low	Guest collection checkout - UI validation
27	Checkout	Low	Secure collection checkout - UI validation

28	Checkout	Low	Guest delivery checkout - UI validation
29	Checkout	Low	Secure delivery checkout - UI validation

30	Checkout	Critical	In store collection checkout - Guest login
31	Checkout	High	Online delivery checkout - Guest login
32	Checkout	High	In store collection checkout - User login

33	Checkout	High	Online delivery checkout - User login
34	Checkout	Low	Edit address and contact information - Online delivery
35	Checkout	Low	Edit address and contact information - Collect in store
36	Checkout	Low	Updating delivery method - Online delivery
37	Checkout	High	UK standard delivery option - Online delivery

38	Checkout	High	UK standard delivery option - Online delivery
39	Checkout	Low	Reducing the quanity of items in the basket to 0
40	Checkout	Low	Proceed with mandatory fields missing

Test Steps (BDD Format) **Status**

Given the user is on the homepage

When the user taps the "Shop the collection" button

Then the user is able to view the Product List page
Given the user is on the homepage

When the user taps the "Search" icon
And the user enters the product name
And the user clicks the "Search" button

Then the user is able to view the Product List page
Given the user is on the homepage

When the user taps the "Shop" icon
And the user taps the desired collection

Then the user is able to view the Product List page
Given the user redirected to Product list page

When the user view the Product list page

Then the user should see the header elements:
- Collection Name
- Sort by Tab
- Filter Tab
- Product Count
- Clear All

And the user should see the product card structure:
- Product Image
- Wishlist Icon
- Add to Basket Icon

And each product should display
- Name
- Price
- Special Tags (New/Limited/Pre-order) if available
- Reviews (if available)

Given the user is on the Product List page

When the user taps on "sort by" option
And the user taps on "Filter" option

Then the user is able to perform below functionalities
1. Sort by - Relevance
2, Sort by - High to low
3. Sort by - Low to high
4. Filter - Stock Availability
5. Filter - Types
6. Filter - Product Features
7. Filter - Benefit
8. Filter - Mood
9. Filter - Scent
10. Filter - color
11. Filter - Key ingredients

And the user is able to "share" the product list
Given the user is on the search page

When the user enters the random value

Then the user is able to view empty page with no products
And the user is able to view "sort by" and "filter" option
And the user is able to view product count as "0 results"
Given the user is on the product list page

When the user taps on add to bag icon

Then the user is able to view the popup to select size if multiple size available
And the pop up message with product name and price
And the product added to the cart

Given the user is on the product list page

When the user taps to view a product

Then the product page displays the details: image, name, price, and description
And the user sees the "Wishlist" and "Share" icons
And the page displays the product information:
- Select size
- Quantity counter
- Store selection option

And the section displays the "Online delivery" and "Click and collect" availability
And the active "Add to bag" button and Klarna link are visible
And the following product information sections are displayed:
- How to use
- Ingredients
- Explore

And the tagline with description "Fighting animal testing"
And the product reviews and "You might also like" recommendations are visible

Given the user is on the product list page

When the user taps to view a product not in stock

Then the product page displays the details: image, name, price, and description
And the user sees the "Wishlist" and "Share" icons
And the page displays the product information with below state:
- Select size as unavailable
- Quantity counter available
- Store selection option enabled

And the section displays the "Online delivery" and "Click and collect" availability
And the inactive "Add to bag" button and Klarna link are visible
And the following product information sections are displayed:
- How to use
- Ingredients
- Explore

And the tagline with description "Fighting animal testing"
And the product reviews and "You might also like" recommendations are visible

Given the user is on the product page

When the user taps on item count
And the user taps on add to basket icon

Then the user able to view the popup message with product name and price
And the user able to view click and collect availability
And the product added to the cart

Given The user view the product unavailable

When The user tap on the "Add to basket" button

Then The product should not get added to the basket
Given the user is on the product page

When the user taps on item count to maximum of 50
And the user taps on add to basket icon

Then the user able to see the popup message with product name and price
And the user able to view click and collect availability
And the user able to view online availability
And the product added to the cart
Given the user is on the product page, that is in limited stock

When the user taps on item count to maximum
And the user taps on add to basket icon

Then the user able to see the popup message "Sorry you cannot add anymore of this product to your bag"

Given the user is on the product page

When the user tap on select another shop

Then the user able to select new shop
And the user able to view product availability based on selected shop
Given the user has added the products to the basket

When the user tap on the "Bag" icon

Then the "My Bag" screen displays the heading with the correct item count
And the user sees the checkout options for "Delivery" and "Collect in shop" alongside the "Shop location"
And the basket displays the added products with their respective sizes, item counters, "Wishlist", and "Delete" icons
And the product subtotal and total are displayed
And the "Checkout" button is visible

Given the user is logged in to LUSH APP
And the user has added the products to the basket

When the user tap on the "Bag" icon

Then the "My Bag" screen displays the heading with the correct item count
And the user sees the checkout options for "Delivery" and "Collect in shop"
And the edit shop option to update collection location
And the Add Reward section
And the basket displays the added products with their respective sizes, item counters, "Wishlist", and "Delete" icons
And the product subtotal and total are displayed
And the "Checkout" button is visible
Given the user is on the "My Bag" page
And the product "In - stock" added to the bag
And the click and collect "Ready in 2-4 days" product is added to the bag

When the user taps on "Collect in shop" option

Then the user is able to edit location with "Select shop" option
And the user is able to update product count/delete/wishlist the products
And the user is able to view the product "Total"
And the user is able to view the text "Free! Collect in shop text" with £0.00
And the user is able to view the active "Checkout" button
Given the user is on the "My Bag" page
And the product in stock added to the bag, and its price less than £50

When the user taps on "Delivery" option

Then the user is able to view the added products
And the user is able to update product count/delete/wishlist the products
And the user is able to view the product "Total"
And the user is able to view the text "Almost there! Spend another ..... to get FREE UK standard delivery"
And the user is able to view the active "Checkout" button
Given the user is on the "My Bag" page
And the product in stock added to the bag, and its price equal or more than £50

When the user taps on "Delivery" option

Then the user is able to view the added products
And the user is able to update product count/delete/wishlist the products
And the user is able to view the product "Total"
And the user is able to view the text "Your order qualifies for FREE standard UK delivery!" should be displayed
And the user is able to view the active "Checkout" button

Given the user is on the "My Bag" page, added one or more products
And the user has rewards to claim

When the user taps on Add reward option

Then the reward is applied
And the total gets updated
And the user sees the active checkout button
Given the user is on the "My Bag" page
And the out of stock product added to the bag

When the user taps on "Delivery" option

Then the user is able to view the added products
And the user is able to view availability as out of stock
And the user is able to view the inactive "Checkout" button
Given the user has empty basket

When the user taps on bag icon

Then the user is able to view the text "Your bag is empty.."
And the user is able to redirect to homepage by clicking "Start shopping" button

Given the user is on the "My Bag" page
And the user has added maximum of 50 products to the bag

When the user taps on product counter

Then the user is not able to increment the counter
Given the user is on the "My Bag" page
And the user has few products to the bag

When the user taps on delete icon

Then the added product is removed from the basket
And the product total price is updated
Given the user is on the "My Bag" page and products added to the bag

When the user click on edit shop

Then the user is able to select new shop
And the user is able to view product availability based on selected shop

Given the user is on the My Bag Click and collect page
And the user has items in the cart

When the user taps on guest checkout

Then the user sees the Bag Summary and Total
And the user sees the contact information fields
And the user sees the Shop Location and Billing Address
And the accepted payment methods are displayed
And the terms, conditions, and privacy notice are visible with a checkbox
And the "Proceed to Payment" button is displayed

Given the user has logged in to LUSH app
And the user is on My Bag , Click and collect page
And the user has added few items to the cart

When the user taps on checkout button

Then the checkout screen displays the Bag Summary, Reward section, and Bag Total
And the user sees their Contact Information, Shop Location, and Billing Address
And the accepted payment methods are displayed
And the terms, conditions, and privacy notice are visible with a checkbox
And the "Proceed to Payment" button is displayed

Given the user is on My Bag page, products in stock added to the basket
And the user tap on checkout to collect in shop

When the user tap on guest checkout

Then the checkout screen displays the Bag Summary and Bag Total
And the user can input their email and delivery address
And the available delivery methods are visible with their respective prices:

Delivery Method	Price
UK Standard Delivery	£3.95
Next Working Day	£6.95
UK Sunday Delivery	£8.95
Saturday Delivery	£8.95

And the following order customisation checkboxes are visible:
- Add a delivery note
- Add a gift message
- Add Lush Times, our free magazine
- Add paper bags for naked products

And the accepted payment methods are displayed
And the terms, conditions, and privacy notice are visible with a checkbox
And the "Proceed to Payment" button is displayed
Given the user is logged in to LUSH APP
And the user is on My Bag page, products in stock added to the basket
And the user tap on checkout to collect in shop

When the user tap on secure checkout

Then the checkout screen displays the Bag Summary and Bag Total
And the user can input their email and delivery address
And the available delivery methods are visible with their respective prices:

Delivery Method	Price
UK Standard Delivery	£3.95
Next Working Day	£6.95
UK Sunday Delivery	£8.95
Saturday Delivery	£8.95

And the following order customisation checkboxes are visible:
- Add a delivery note
- Add a gift message
- Add Lush Times, our free magazine
- Add paper bags for naked products

And the button to apply reward if available
And the accepted payment methods are displayed
And the terms, conditions, and privacy notice are visible with a checkbox
And the "Proceed to Payment" button is displayed

Given the user is in Guest checkout page
And the user has entered name in the text box
And the user has entered valid email address in the textbox
And the user has added billing address
And the user has clicked on terms and conditions checkbox

When the user clicks on proceed to payment button

Then the user is able to view the payment methods
And on selecting the desired payment method, the user gets redirect to corresponding payment page to complete the purchase
Given the user is in Guest checkout page
And the user has entered valid email address in the textbox
And the user has added delivery address
And the user has clicked one of the delivery method
And the user has checked on delivery note
And the user has checked on Add a gift message
And the user has checked Lush Times, our free magazine
And the user has checked add paper bags for naked products
And the user has added billing address
And the user has checked on terms and conditions

When the user clicks on proceed to payment button

Then the payment methods are displayed
And selecting the payment method, redirects the user to corresponding payment page to complete the purchase
Given the user is in Secure checkout page
And the user has entered name in the text box
And the user has entered valid email address in the textbox
And the user has added billing address
And the user has checked on terms and conditions

When the user clicks on proceed to payment button

Then the payment methods are displayed
And selecting the payment method, redirects the user to corresponding payment page to complete the purchase

Given the user is in Secure checkout page
And the user has entered valid email address in the textbox
And the user has added delivery address
And the user has selected one of the delivery method
And the user has added billing address
And the user has checked on terms and conditions

When the user clicks on proceed to payment button

Then the payment methods are displayed
And selecting the payment method, redirects the user to corresponding payment page to complete the purchase

Given the user is in Secure checkout page

When the user taps on edit email
And the user taps on edit delivery address

Then the user is able to enter and save new email
And the user is able to enter and save new delivery address

Given the user is in Secure checkout page

When the user taps on edit name
And the user taps on edit email
And the user taps on edit billing address

Then the user is able to enter and save new name
And the user is able to enter and save new email
And the user is able to enter and save new address

Given the user is in Secure checkout page
And the bag summary cost more than for £50

When the user taps on delivery methods other than standard delivery

Then the user get £6.95 delivery fees and it get adds to the bag total

Given the user is in Secure checkout page
And the bag summary cost more than or equal to £50

When the user taps on UK standard delivery

Then the user get £0 delivery fees

Given the user is in Secure checkout page
And the bag summary cost less than £50

When the user taps on UK standard delivery

Then the user get £3.95 delivery fees and it get adds to the bag total
Given the user has added one or more products to the basket
When the user reduces the quantity of a product to 0
Then the product is removed from the basket and empty basket message is displayed
Given user is on the checkout page
When user leaves mandatory fields empty and taps proceed to payment
Then user "proceed to payment" button is inactive

Bug id	Feature	Bug Title	Test steps
1	Product page	Product page showing incorrect UI components for unavailable products	1. Launch LUSH app 2. Tap on the unavailable product from Product List page loaded from homepage or Search or Shop Page. 3. Observe the product page
2	Product List Page	Sort function not working on product list page	1. Launch LUSH app 2. Tap on search icon 3. Search for the product 4. Sort the Product list High - Low 5. Observe the sorted product list page
3	Product List Page	Product list showing irrelavant product list on applying sort functionality	1. Launch LUSH app 2. Tap on search icon 3. Search for the product 4. Sort the Product list Price High - Low 5. Observe the sorted product list page
4	Product page	External Klarna link Landing on incorrect page when returning to app	1.Launch the LUSH app 2. Login to the app 3. Select any product 4. Click on "learn more" Klarna link 5. Press back button
5	My Bag	The store location overlapping with the "Edit shop" option	1. Launch the LUSH app 2. Login to the app with valid username and password 2. Tap on any product 3. Add the product to basket 4. Tap the basket icon 5. Tap the "Collect in shop" option 6. Tap on find store 7. Choose the store that has long name 8. Close the map 9. Observe the collection location in the basket

			1. Launch the LUSH app 2. Login to the app with valid username and password 2. Tap on any product 3. Add the product to basket 4. Tap the basket icon 5. Tap the delivery option 6. Tap the checkout button 7. Enter the delivery address 8. Save the address 9. Close the app end the session 10. Re Launch the LUSH app 11. Tap the basket icon 12. Tap the delivery option 13. Tap the checkout button
6	Checkout	Unable to view the saved address	14. Observe address field
			1. Launch the LUSH app 2. Login to the app with valid username and password 2. Tap on any product in stock 3. Add the product to basket 4. Tap on basket icon 5. Tap on + or - to update product count 6. Observe the quantity count
7	My Bag	Unable to update product count	
8	Homepage	Bottom navigation bar shown in the middle of homepage	1.Launch LUSH app 2.Oberve the homepage
			1. Launch LUSH app 2. Shop for the product "Ready in 2-4 days" 3. Add the product to basket 4. Tap on collect in shop 5. Tap on checkout
9	My Bag	Unable to checkout Ready in 2-4 days product	
			1. Launch LUSH app 2. Logged in to the app 2. Add the product "out of stock " to cart 3. Add the product "ready in 2-4 days" to cart 4. Tap on collect in shop 5. Tap on checkout 6. Enter the mandatory fields for checkout
10	Checkout	User able to place orders on "out of stock" products	7. Proceed with the payment

Actual result	Expected result
Inconsistent behaviour in the product page. 1. From homepage - "Add to basket" option is active 2. From Shop icon - "Add to basket" option is inactive 3. From Search icon - "Add to basket" option is not available	Product page UI components should be consistent
The product list not sorted as per the given condition.	The product list should get sorted with the given condition
The product list get updated with irrelevant products	Product list relevance to search must be sorted and displayed
